President’s Leadership Institute
LEAD
YES, YOU CAN!

President’s Leadership Institute

At Albany Technical College, we believe that everyone has the potential to be a leader. With this in mind, the President’s Leadership Institute was established. The Leadership institute is a free leadership training program focused on helping students develop and apply their unique skills. During the course of the program, students will enjoy exposure to the arts, participate in workshops and campus life, develop civic understanding, and give back to the community through service.

What Are the Benefits of Participation?
Through participation in workshops and campus activities, students will explore and develop their unique strengths and talents. These experiences will enhance the life of the student enabling them to make a difference on campus and in the community. Recognition at graduation and recognition on their college transcripts sets these students apart.

How Do I Apply?
To participate, students must be currently enrolled in at least six credit hours, have not completed more than 18 credit hours and complete a leadership program application by the first week of the semester. Contact the Office of Student Life located in the Logistics Education Center, Room 102.

What Are the Program Requirements?
Students must attend orientation and a luncheon with the President and his Cabinet. Students must complete 15 approved activities or workshops prior to graduation. These activities and workshops include self-management and goal setting, civic and campus life events, cultural opportunities and community service. One of the great things about the program is that students do it at their own pace. Most workshops last one hour and a student’s involvement is spread over time that they are enrolled until graduation. The intent of the program is to provide the maximum flexibility necessary to enable students to participate in this valuable leadership opportunity, while pursuing their academic studies, working and fulfilling other obligations. Students enrolled in the program must maintain a GPA of 2.0 or higher.
